

Wolfson Fertility Centre Price List

Valid 1 April 2023 – 31 March 2024

This price list provides information about our treatments, investigations and package prices. Please note payment will need to be made before treatment commences.

Fertility Assessment Package with virtual consultation with clinical Wolfson team member**	
Single Female assessment (1) – AMH blood test, ultrasound scan & virtual consultation* *	£350
Single Female assessment (2) – AMH blood test, ultrasound scan, HyCoSy & virtual consultation**	£600
Single Male assessment – Semen assessment & virtual consultation**	£250
Couple assessment: Male & Female – AMH blood test, ultrasound scan, semen assessment & virtual consultation**	£520
Couple assessment: Same sex Female couple – AMH blood test, ultrasound scan per patient & virtual consultation**	£600
Couple assessment: Same sex Male couple – Semen assessment per patient & virtual consultation**	£400

****This virtual appointment will be undertaken by a clinical member of the Wolfson Fertility Centre team. If you wish to be seen for a private consultation with your chosen consultant this must be booked and paid directly through their secretary.****

Storage of eggs, embryos & semen	
Annual storage fee – this fee is subject to a yearly increase <i>(annual charges for either embryos, eggs or sperm and is non-refundable if the samples are stored for less than 12-months)</i>	£350

The 1st pregnancy scan after a successful treatment cycle with us is included in the package price. Additional pregnancy scans will be charged as per the pricelist.

Treatment package prices

All cycle prices are provided in packages. Packages for IVF include the nurse pre-treatment appointment, counselling session (2 appointments), in treatment scans, in treatment bloods, egg collection, intravenous sedation administered by an Anaesthetist at egg collection, blastocyst culture (as appropriate), embryo transfer, pregnancy test, early pregnancy scan *or* review consultation in the event of a negative outcome within three months of the pregnancy test (for fresh cycles only), and the HFEA licence fee. Drugs are charged separately and vary from patient to patient. You will be required to pay for prescriptions upon collection from the pharmacy of your choice.

Updated: April 2023 (V.01)

Any blood or diagnostic tests required before the treatment cycle are not included in a package price. (*Infection screening for HIV, Hepatitis B and Hepatitis C will not be charged if you have a cycle of treatment with us within 3 months of the blood tests*). At the time of your coordination appointment you will be required to pay in full for the treatment package.

The fee for medical consultations are not included in the package price and can be obtained from the consultant's PA should you chose to have a private consultation. This fee is paid directly to the private consultant. Treatment starts after you have seen the consultant of your choice, who will plan the details with you. Your consultant's PA will be able to tell you about any fees for follow up consultations should these be required.

Single Treatment Package Prices (Excluding cost of medication)	
In- vitro fertilisation (IVF)** treatment package (<i>includes nurse pre-treatment co-ordination appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, fertilisation, blastocyst culture (as appropriate), embryo transfer, pregnancy test, early pregnancy scan*** and the HFEA license fee, including freezing and 1 year storage of surplus embryos</i>)	£4900
Intracytoplasmic sperm injection (ICSI)** (<i>includes nurse pre-treatment co-ordination appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, ICSI (micro injection of sperm), blastocyst culture (as appropriate), embryo transfer, pregnancy test, early pregnancy scan*** and HFEA licence fee, including freezing and 1 year storage of surplus embryos</i>)	£6110
Egg storage cycle (<i>includes nurse pre-treatment appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, vitrification of suitable eggs, first year's storage</i>)	£3740
Egg thaw, fertilisation and embryo transfer cycle (<i>includes nurse pre-treatment appointment, two counselling sessions, treatment scans, treatment bloods, egg thaw, ICSI (micro injection of sperm), embryo transfer, pregnancy test, early pregnancy scan*** (excludes storage of excess embryos)</i>)	£3245
Embryo freezing cycle with IVF (<i>includes nurse pre-treatment co-ordination appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, fertilisation, blastocyst culture (as appropriate), embryo freezing (vitrification), first year's storage and HFEA license fee</i>)	£4510
Embryo freezing cycle with ICSI (<i>includes nurse pre-treatment appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, ICSI (micro injection of sperm), blastocyst culture (as appropriate), embryo freezing (vitrification), first year's storage and HFEA licence fee</i>)	£5720
Frozen Embryo Replacement Cycle (FERC) (<i>includes nurse pre-treatment appointment, two counselling sessions, treatment scans, treatment bloods, embryo thaw, embryo transfer, pregnancy test, early pregnancy scan***. Please note no follow-up consultation is included in this package; it will be charged separately if required and you must book directly through your chosen consultant's secretary</i>)	£1675
Intrauterine insemination (IUI) (<i>includes nurse pre-treatment appointment, two counselling sessions, treatment scans, treatment bloods, sperm preparation, insemination, pregnancy test, early pregnancy scan***. Please note no follow-up consultation is included in this package; it will be charged separately if required and you must book directly through your chosen consultant's secretary</i>)	£1100
Ovulation induction with clomiphene citrate/letrozole (OI) (<i>treatment scans, treatment bloods and 1 early pregnancy scan***. Please note no follow-up consultation is included in this package; it will be charged separately if required and you must book directly through your chosen consultant's secretary</i>)	£500
Ovulation induction with gonadotrophins (OI) (<i>treatment scans, treatment bloods and 1 early pregnancy scan***. Please note no follow-up consultation is included in this package; it will be charged separately if required and you must book directly through the secretary</i>)	£750

**NB: On the day of the egg collection procedure, the sperm may not prepare well, requiring the treatment to be changed from IVF to ICSI. Should this occur, then the difference in cost between an IVF and ICSI package will be charged accordingly. This will be discussed with you on the day if appropriate.

Updated: April 2023 (V.01)

Introducing our new discounted 3rd cycle offer

We have now introduced a three cycle discount to our IVF/ICSI embryo transfer cycle price packages. Please ensure you read the terms and conditions carefully.

The 1st and 2nd cycles will cost the same as a single package price listed above. The 3rd cycle, however, has a 15% discount applied to the single price package for your prescribed treatment. In order to receive this 15% discount on the 3rd treatment cycle, you must complete all three treatment packages within 12 months of the date of the first egg collection.**

3rd Cycle Package Price including the 15% discount (terms and conditions apply as above) (excluding medication)	
Discounted cycle package In-vitro fertilisation (IVF)** treatment package <i>(includes nurse pre-treatment co-ordination appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, fertilisation, blastocyst culture (as appropriate), embryo transfer, pregnancy test, early pregnancy scan*** and the HFEA license fee, including freezing of surplus embryos up to the date of the original egg collection)</i>	£4165
Discounted cycle package Intracytoplasmic sperm injection (ICSI)** <i>(includes nurse pre-treatment co-ordination appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, ICSI (micro injection of sperm), blastocyst culture (as appropriate), embryo transfer, pregnancy test, early pregnancy scan*** and HFEA licence fee, including freezing of surplus embryos up to the date of the original egg collection)</i>	£5193
Discounted cycle package Egg storage cycle <i>(includes nurse pre-treatment appointment, two counselling, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, vitrification of suitable eggs up to the date of the original egg collection)</i>	£3740
Discounted cycle Embryo freezing cycle with IVF <i>(includes nurse pre-treatment co-ordination appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, fertilisation, blastocyst culture (as appropriate), embryo freezing (vitrification) up to the date of the original egg collection and HFEA license fee)</i>	£3834
Discounted cycle Embryo freezing cycle with ICSI <i>(includes nurse pre-treatment appointment, two counselling sessions, treatment scans, treatment bloods, egg collection, intravenous sedation at egg collection, sperm preparation, ICSI (micro injection of sperm), blastocyst culture (as appropriate), embryo freezing (vitrification) up to the date of the original egg collection and HFEA licence fee)</i>	£5720

**NB: On the day of the egg collection procedure, the sperm may not prepare well, requiring the treatment to be changed from IVF to ICSI. Should this occur, then the difference in cost between an IVF and ICSI package will be charged accordingly. This will be discussed with you on the day if appropriate.

Chargeable Extras	
Additional freeze / thaw charge <i>(this applies when additional eggs or embryos are thawed / re-frozen with the fresh IVF/ICSI cycle)</i>	£450
Supportive or Implications counselling with our in house counsellor – first 2 sessions are inclusive of the treatment cycle package price. Additional sessions are chargeable	£85
Cooper Genetics Counselling Session	£160
Cyst drainage under sedation	£680
Embryo transfer under sedation	£680
Sperm freezing prior to IVF/ICSI <i>(including analysis, freezing and first year of storage)</i>	£470
IM Injection by a nurse <i>(you will be required to take most injections outside of the unit hours in order to follow protocol)</i>	£25

Updated: April 2023 (V.01)

Follicle/cycle monitoring (per scan)	£200
--------------------------------------	------

Add on treatments

The Wolfson Fertility Centre provides evidence-based treatments, and we actively participate in research to further our knowledge and develop new treatment options. We are also open-minded about emerging techniques which may not yet have been proven to improve pregnancy rates. Where relevant, your consultant may discuss optional extras (“add-ons”) plus the research and potential benefits and risks associated with them at your consultation. Please see below for our charges.

Add ons***	
Endometrial scratch (<i>if sedation is required there will be an additional cost of £350</i>)	£295
Embryo Glue	£65

****We advise you to refer to the HFEA website for further information regarding the use of additional techniques in your treatment prior to consenting to their use.

Genetic testing

PGT-M (<i>formally PGD</i>) Pre Implantation Genetic Testing for Monogenic Diseases with Karyomapping (<i>price includes biopsy analysis of up to 9 embryos and the freezing and storage of those embryos for 1 year. It includes a non-refundable work-up fee of £400 in case of cancellation and 1 mandatory genetic counselling session. This price excludes the cost of the IVF/ICSI treatment cycle and frozen embryo transfer cycle</i>)	£5740
PGT-A (<i>formally PGS</i>) Pre-implantation Genetic Testing for Aneuploidies (<i>includes biopsy, price includes analysis of up to 5 embryos only, and the freezing and storage of those embryos for the first year. This price excludes the cost of the IVF/ICSI treatment cycle and frozen embryo transfer cycle</i>)	£2640
Additional analysis (<i>per embryo above 9 for PGT-M and above 5 for PGT-A</i>)	£220 per additional embryo
Embryo thaw, biopsy and refreeze (<i>includes the thaw of up to 5 embryos, biopsy of embryos and refreezing – does not include the cost of the genetic testing as detailed above</i>)	£1320
Thaw, biopsy and refreeze of additional embryos (more than 5)	£220 per embryo

Female Assessments

AMH	£125
FSH (<i>Follicle-stimulating hormone</i>)	£70
LH (<i>Luteinizing hormone</i>)	£70
E2 (<i>Oestrodiol</i>)	£70

Updated: April 2023 (V.01)

3D Aqua or saline scan	£425
HyCoSy	£540
Pregnancy scan***	£245

*** The 1st pregnancy scan after a successful treatment cycle with us is included in the package price. Additional scans will be charged as per the pricelist.

Male Assessment	
Semen assessment (A semen analysis looks at the volume and quality of a man's sperm)	£125
FSH	£70
LH	£70
Testosterone blood test	£46.50
Y-chromosome microdeletion blood test	£216.50
Karyotype blood test	£450
CF (Cystic fibrosis)	£273

Other blood tests	
CMV (<i>Antigen</i>)	£110
TPHA (<i>Treponema pallidum hemagglutination assay</i>)	£110
HCG (<i>Beta HCG</i>)	£105
Progesterone	£46.50
Thyroid antibodies	£105
Thyroid function test	£105
Prolactin	£46.50
Rubella	£47.50
HEP B DNA (<i>viral load</i>)	£300
HEP C quantification (<i>viral load</i>)	£260
Treponemal serology	£60
Fragile X Syndrome	£319.50
Zika by PCR (Blood)	£220
Haemoglobin electrophoresis	£100

Updated: April 2023 (V.01)

Tay-Sachs	£335
Thalassemia	£150
Sickle Cell	£100
Other bloods	POA

Other Screening packages		
Virology	Pre-treatment screen (female and male) – (HIV, Hepatitis B surface antigen, Hepatitis B core antibody and Hepatitis C Screening prior to IVF treatment)	Included in treatment price package
IVF F	Chlamydia urine screen	£90
IVF G	Gonorrhoea urine screen	£60

Movement of Samples	
<p>Movement of frozen samples – WITHIN THE UK****</p> <p>If you wish to transport your eggs, sperm or embryos from the Wolfson Fertility Centre to another IVF unit within the UK, please send us the name of the unit where they will be transported to and the name of an individual and/or email address for correspondence with that IVF unit.</p> <p>To move samples into the Wolfson Fertility Centre you must have completed an initial consultation. This fee includes the cost of 1 year's storage.</p>	£350
<p>Movement of frozen samples – INTERNATIONAL****</p> <p>If you wish to transport your eggs, sperm or embryos from the Wolfson Fertility Centre to another IVF unit, please send us the name of the unit where they will be transported to and the name of an individual and/or email address for correspondence with that IVF unit.</p> <p>To move samples into the Wolfson Fertility Centre you must have completed an initial consultation. This fee includes the cost of 1 year's storage.</p>	£450

**** There are courier fees associated with the transport of samples. These are paid directly to the courier and is not included in the listed price. There are several couriers available, and you can email them directly to obtain a quote.

Important Finance information

Payment in full is due before the nurse pre-treatment co-ordination appointment. Payment for pathology tests are due at the time the request form is produced and the consultation fees are due upon attendance. Payment for drugs is due before the drugs are dispensed at the pharmacy and are paid directly to the pharmacy.

Payment methods

We prefer that you pay using debit or credit cards, with the exception of American Express. We accept card payments in person or via the telephone in advance of your treatment. We will accept cash via the Cashiers office in the Sainsbury Wing at Hammersmith Hospital.

Please note, when making card payments we may store your card on your account. We will not do this without asking you first. This makes it easier to process potential refunds or deduct annual storage payments or settle outstanding balances. We will not take a payment without notifying you. Please ensure you provide us with your up to date contact and home address information so you receive this notification.

Deposits

To secure your nurse pre-treatment co-ordination appointment booking, we will require a deposit for your treatment package. Due to high demand, we require at least 48 hours' notice if you chose to cancel or reschedule this appointment. You will be charged a cancellation fee as per the below cancellation policy.

Insurance

If you are insured and your insurance company is paying your account, you will be required to pay a deposit for your treatment and you may claim this back directly from them.

Refunds and cancellation

Imperial Private Healthcare appreciates that there are a number of reasons for why a patient may decide not to proceed with their treatment or treatment is discontinued for medical reasons. In these circumstances a full or partial refund may apply depending on the treatments delivered so far. Please see below for the cancellation policy.

If you decide not to go ahead with your treatment, please provide us with the original receipt and we will make the appropriate refund as per the cancellation policy. If you would like to apply for a refund, please email imperial.wfadmin@nhs.net. Please note card refunds take approximately five working days to return to your bank account dependent on your bank. For security reasons, the refund will only be returned to the same card with which you paid with. Cash and Bank Transfer refunds may take longer. Further details of the cancellation fees per treatment type are detailed below.

IVF, ICSI, egg freezing or egg donation cycle

If an IVF, ICSI, egg freezing or egg donation cycle is discontinued before treatment or screening/ co-ordination attendance has started, you are entitled to a full refund of the treatment package price. We cannot make any refunds for the cost of consultations, pre-treatment investigations or the cost of drugs for the treatment cycle that have been paid for at a pharmacy.

If no eggs are collected or collected eggs do not fertilise or the fertilised eggs do not create a viable embryo, then a proportion of treatment can be refunded as per the cancellation policy.

Once prescriptions are collected, they cannot be returned. We will always try to minimise wastage with the prescriptions, so you may need to collect more than once for your cycle.

If you are having an IVF or ICSI cycle and your fresh embryo transfer does not go ahead because you are not medically ready, you will be offered to return for a frozen cycle once you have recovered. Please note that this frozen cycle is chargeable per the cost of a FERC on our price list outlined above. You will also receive a partial refund from what you have paid for the IVF or ICSI price package as per the Partial refunds section.

Updated: April 2023 (V.01)

IUI (Intrauterine Insemination)

In the event that insemination does not take place, but you have already started the stimulation drugs, a refund will be given less the cancellation fee. We do not refund any costs relating to the pre-treatment procedures or drugs.

If you start an IUI cycle but the cycle is converted to IVF or ICSI, you will be asked to pay the additional cost which is the difference between the cost of IUI and IVF or ICSI.

FERC (Frozen Embryo Replacement Cycle)

If a FERC cycle is cancelled for medical reasons before your embryos are thawed, we will refund the full cost of the treatment package minus a cancellation fee per the table below. If the embryos fail to thaw successfully, we will issue a refund as per the below table.

Cancellation fees

A cancellation fee will be applicable if a cycle is abandoned, to cover the costs already incurred. We do not reimburse drug costs. Cancellation fees are listed below.

	Fee Payable for Cancelled Cycle
Cancelled IVF or ICSI before medication is started	£285
Cancelled IVF or ICSI after one treatment scan	£555
Cancelled IVF or ICSI cycle after more than one treatment scan but before egg collection	£825
Cancelled IUI cycle prior to insemination	£400
Cancelled FERC after co-ordination appointment	£140
Cancelled FERC after one treatment scan	£410

Partial Refunds

We understand it can be very disappointing if your treatment is not successful. We are unable to reimburse you the cost of the cycle, due to costs incurred, however, we do offer a partial refund in specific circumstances. Your Doctor will confirm this.

	Failed Treatment Refunds
No eggs are collected at egg collection – <i>if any eggs are collected this refund is not applicable.</i>	Refund of £440 for IVF Refund of £1540 for ICSI
Collected eggs fail to fertilise, or the created embryos do not survive to the transfer day	Refund of £440
Thawed embryos do not survive to the transfer day (FERC cycle)	Refund of £240
Fresh Embryo Transfer does not go ahead due to medical reasons	Refund of £390

Pricing FAQ's

What blood tests will I need before I start treatment?

Before you have a cycle of IVF you will need some blood screening tests done. Your doctor will discuss these with you. This may be to check if you are a carrier of some genetic conditions. These blood tests are chargeable and are not included in any of our packages.

If you do have blood results from a recent NHS cycle or a recent private cycle and the results are still valid, the doctors may not need to repeat them. Please note that virology blood tests performed elsewhere must have been done by an appropriately credited laboratory in order to be accepted.

Infection screening for HIV, Hep B and Hep C are included in the cost of a cycle. This screening is a requirement for all patients prior to starting a cycle of assisted conception.

How much will my drugs cost?

Drugs vary from patient to patient. We are unable to guarantee the cost as each patient will respond at different rates. The doctors will always try to prescribe only what they think will be needed, so you may collect more than one prescription per treatment cycle. This helps to avoid wasted medication in case you respond quicker than expected. We are unable to refund the cost of any unused drugs. All drug payments are made directly to the dispensing pharmacy.

How often will I be charged for storage?

Storage is currently £350 and invoiced per annum (*valid for year 22/23 until 31/03/23*). This fee is reviewed annually at the end of March and subject to change. You will be invoiced annually for this charge on the anniversary of your treatment. If you no longer wish to store your sperm, eggs or embryos then you can contact us to discard them. Consent is required for disposal. If you plan to use your samples, but have not yet done so – you will still be invoiced annually. Please ensure you keep us up to date with your address and contact details, to ensure we can contact you regarding storage and consent. Please note, the Wolfson Fertility Centre reserves the right to dispose of your samples if outstanding invoices remain unsettled after 12 months from contact.

Can I have back to back cycles? Is this cheaper?

Some patients may wish to have more than one cycle and we offer attractive multiple package prices. Your consultant will advise you if this is suitable for you.

Can I have my embryos brought here from another clinic?

If you wish to transport eggs, sperm or embryos to the Wolfson Fertility Centre from another IVF unit, please contact the IVF unit where your eggs, sperm or embryos are stored informing them of your wish to transfer them to the Wolfson Fertility Centre. You will need to have a consultation before we can accept a transfer in.

If you wish to transport eggs, sperm or embryos from the Wolfson Fertility Centre to another IVF unit, please contact the Embryology team. We will require the name of the unit where they will be transported to and the name of an individual and/or email address for correspondence with that IVF unit.

There are courier fees associated with the transport of samples. These are paid directly to the courier. Courier fees will vary depending on the destination.

What if I have medication left over?

Medication is dispensed at a pharmacy. As a private patient, you can use the pharmacy here at the hospital or a pharmacy of your choice. The pharmacy based at Hammersmith Hospital aims to price match other pharmacies so the costs remain as low as possible. If you have medication left over, we are unable to refund you. Medicines not needed should be disposed of safely via return to a pharmacy or hospital. The Doctors will try to prescribe only what is needed and adjust this as they monitor your response, and this may mean you need to visit a pharmacy more than once during your treatment.

The cycle was not successful – no eggs were collected, my eggs did not fertilise or they did not result in good quality embryos – can I get a refund?

If no eggs are collected, they fail to fertilise or the resulting embryos are not suitable to use, we offer you a partial refund as per our price list. The doctors are unable to say before the egg collection day, how many eggs are present in the follicles, whether these are suitable for use in treatment, nor whether fertilisation will be successful after eggs are collected.

What happens if I need ICSI instead of IVF on the day of egg collection?

On the day of your egg collection procedure, your partner will be expected to produce a fresh sperm sample unless you are using donor sperm or your partner has paid to freeze and store his sperm. Before commencing treatment your consultant commonly advises male partners to carry out a semen analysis to determine if ICSI is required. Sometimes the sample produced on the day is of low quality and ICSI is then required. In these circumstances, patients who only paid for IVF will be required to pay the ICSI fee difference.

I was not medically ready for a fresh embryo transfer following egg collection, what happens next?

If our clinical team determines you are not medically ready for a fresh embryo transfer following your egg collection this means your embryos will be frozen and stored. You will be advised to return for a frozen embryo replacement cycle (FERC). This FERC cycle is chargeable per our price list. You will also receive a partial refund per our price list. You will need to have a FERC co-ordination appointment with the nurse before you can commence this cycle of treatment.

Please note our price lists and terms and conditions are reviewed in April every year. This means our prices are subject to potential increase in price.
